GAME CADENCE — LAST 5 GAMES (AGGREGATED BY INNING)

METHODOLOGY

Window: 2026-04-08 → 2026-05-04 (11 games)

L5 games: 2026-04-27 vsRVRH (L 6-9), 2026-04-28 @ATHL (L 4-14), 2026-04-30 @GLNL (W 4-2), 2026-05-01 @CNTN (L 0-1), 2026-05-04 vsSWMP (L 6-7)

League average: mean across the focal teams tracked by RVRH analytics

Pitch-level benchmarks (FPS%, S%, 2K K%, Lead BB%): HS literature norms, not focal-team computed

OPS by time-through-order: per-batter encounter count within a pitcher's outing

Shading: green = ≥10% better than benchmark, dark green = ≥20%, red/dark red same convention for worse

Errors in cadence chart: parsed from play-log text rather than gameLog totals (Home_E/Away_E observed flipped in at least one game)

1st-to-3rd metric: intentionally omitted — runner-state inference produced too many false positives

Generated: from RVRH repository.json + game files
